

## California Advanced Lighting Controls Training Program (CALCTP) Systems Course

**For:** Mid-level managers and contractor staff (e.g., estimators, project managers, engineers, etc.), who *do not* possess a CA General Electrician certification

**Date/Time:**

Thursday, **August 25, 2011**

Registration & Continental  
Breakfast: **6:00 a.m.**

Seminar:

**6:30 a.m. – 5:00 p.m.**

**Location:**

Electrical Training Institute  
6023 S. Garfield Ave.  
City of Commerce, CA

**Fee:** \$45 per participant

This ten-hour course is designed for middle-level managers and contractor staff (e.g., estimators, project managers, engineers, etc.), who **do not** possess a state certification as a General Electrician, to meet one of the requirements for California Advanced Lighting Controls Training Program (CALCTP) Contractor certification. The course consists of lecture and a final exam.

CALCTP is a statewide initiative aimed at increasing the use of lighting controls in commercial buildings and industrial facilities. CALCTP partner utilities (such as So. Cal. Edison) will require CALCTP-certified contractors and general electricians on these projects in order to qualify for incentives.

**If your company has already fulfilled the CALCTP Business Development Course requirement, then completion of the Systems course will satisfy the final requirement needed for CALCTP certification. See reverse for information on how many employees must complete the course for the company to qualify for certification.**

For more information about the requirements for becoming a CALCTP-certified contractor, please visit the website at <http://calctp.org>.

This class is open to IBEW-signatory employers that contribute to the L.A. County IBEW/NECA LMCC through a local collective bargaining agreement.

Please RSVP by fax (626-792-6372) or email ([bart@laneca.org](mailto:bart@laneca.org)) and return original **by August 12th** with check payable to:

LMCC  
100 E. Corson St., Suite 410  
Pasadena, CA 91103

The number of employees who must complete the CALCTP Systems Course is determined by the number of people typically employed by the contractor. The numbers listed in the left column are based on the total number of employees (field and overhead personnel).

<b>Contractor Category</b>	<b>Minimum Criteria of Professional Staff needed to complete the Systems Course</b>
<b>Micro Small Contractor (1-25)</b>	<b>1</b>
<b>Small Contractor (26-100)</b>	<b>2</b>
<b>Large Contractor (101 or more)</b>	<b>2 in HQ, plus 1 per division or region</b>
